Skills

Python, Bash, C, Git, Linux (CentOS), Wireshark, Traffic Analysis, Pattern Matching

Experience

Senior Software Engineer / Team Lead at *Mobileum, Remote, Greece.* **Nov. 2016 – Present**

◇ Started as a junior developer working on the core product engine with performance-critical requirements, scaling demo code into full production software.
◇ Combined development work with DevOps responsibilities, including deployments, environment setup, troubleshooting and on-site operational support.
◇ Took on development responsibilities across the engine and product-specific language, focusing on traffic analysis and signature development used in production systems.
◇ Acted in customer-facing technical roles, delivering training and addressing technical feasibility and implementation questions in project and customer meetings.
◇ Leading the engineering team in Greece as a senior software engineer and acting as the primary technical escalation point for complex requirements, system stability issues and product limitations.
◇ Supported the organization through startup growth and subsequent company acquisition, ensuring technical continuity and knowledge retention.

Analyst-Programmer at *Directorate of Cyber-Defence / Hellenic National Defence General Staff, Athens, Greece.* **Dec. 2015 – July 2016**

◇ Worked as a software developer in security-focused environments supporting cyber-defence operations.
◇ Participated in national and international cyber security exercises and incident simulation activities.

Research/Teacher Assistant at *FORTH-ICS, Heraklion, Greece. & Stevens Institute Of Technology, Hoboken, U.S* **Sep. 2012 – Oct. 2015**

◇ Conducted research activities in the areas of computer security and high-performance computing, resulting in two publications in international security conferences.
◇ Supported undergraduate courses as a teaching assistant, assisting with labs, exercises and student guidance across multiple subjects.

Education

M.Sc. in Distributed Computing Systems Computer Science Department, *University of Crete.* **Sep. 2013 – Oct. 2015**

◇ Security & High Performance Computing.

B.Sc. in Computer Science Computer Science Department, *University of Crete.* **Sep. 2007 – July 2013**

Publications

You can Type, but You Can't Hide: A stealthy GPU-based Keylogger. *EuroSec* **April 2013**

GPU-Disasm: A GPU-Based X86 Disassembler. *ISC* **Sept. 2015**

Hobbies & Volunteering

Salsa & Bachata dancer, organising Parties and Events.

Volunteer at Smile of the Child organization.

Regular Blood Donor
